# DEVINE

The HD25T has been designed & tested over the past 2 years with significant success. Proving to be a heavy duty & hard wearing forestry grapple with the following features:

The Pin setup is made from Induction hardened chrome bar, acting on a combination of sealed D Glide & hardened bushes. The pins & bushes are as good as it gets & with wiper seals installed they have proven to last even longer. Significant reduction in maintenance cost & downtime can be expected.

The pivot points are solid steel to meet the heavy duty requirements, as this has proven to be a weak point in most grapples fatiguing over time. This is especially important to match the pins & bushes longer life with a solid boss.

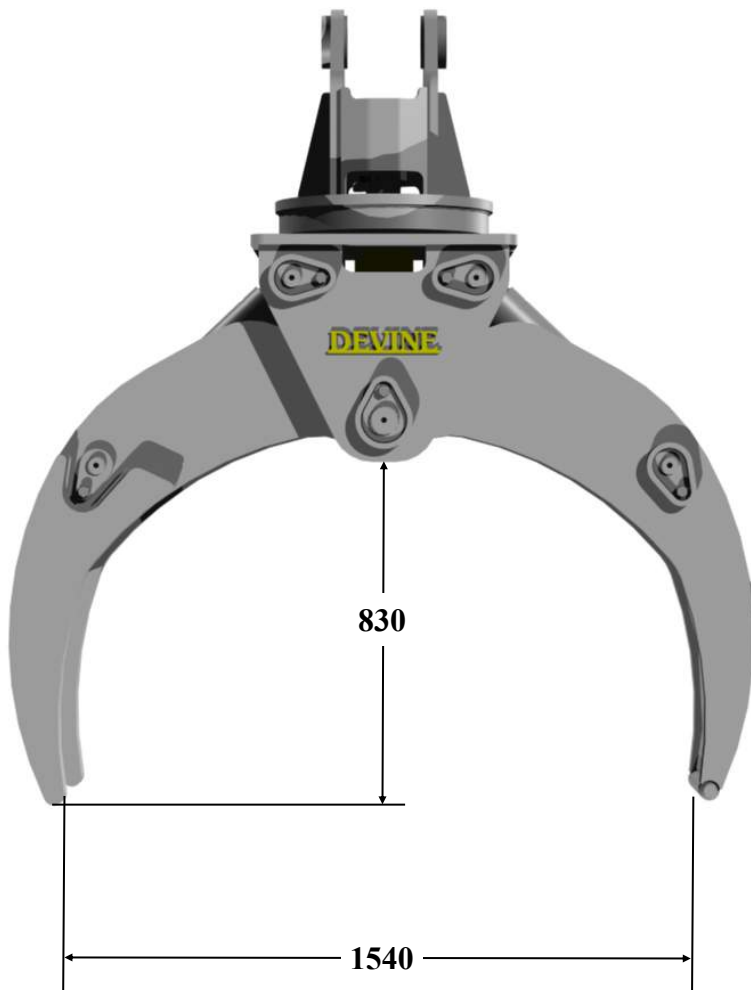

# HD25T

The Hydraulic setup utilises UNO porting with JIC Gates hosing from Hydraulink. Just 4 hoses required for the Centre Joint with combined Manifold design.

The Jaw set has many design features from a wide top providing ram protection, to significant hard facing coverage for contact area. Up to 150% more hard facing than most grapples including higher build, caps off the title of a hard wearing grapple.

The Jaw shape & Ram configuration is optimised for grab & holding power. Combined with the overall design from the hanger down, this grapple provides great log control when shovelling and loading out. This is a high spec grapple with no expense spared. Providing greater efficiency, reduced running costs & downtime.

Call today and get your Grapple a week from order date.

Above:  
Highly recommended hose through centre  
set up, for the pin-on sock & grapple hanger.

Protecting your hoses from the occurrence of  
snags & crushing.

### Warranty Policy

Devine Engineering (2006) Limited warrants to the original purchaser that the equipment sold under this warranty will be free from defects of materials & workmanship for a period of 12 months from the date of purchase.

Devine Engineering will undertake to repair or at its option, replace any defective part within this period. This warranty does not cover maintenance items such as pins & bushes, or damaged caused by, misuse, neglect, abuse, improper operation, modifications or lack of maintenance. Return to base, for repairs under warranty maybe required.

In addition, this warranty in its entirety does not cover minor service items including leaking hoses or fittings, tightening nuts and bolts, blocked or broken grease nipples or any items therein determined to be of a minor service nature in the opinion of Devine Engineering.
